

## Who We Are

As a subsidiary of John H. Carter Company, ControlWorx provides expert product knowledge, maintenance, diagnostic services, and highly-specialized solutions for valves, actuators, automation systems, as well as other critical assets and instrumentation. ControlWorx takes pride in not only helping you with quick troubleshooting and problem identification, but also providing assistance for long-term care with preventive maintenance and a best-practices approach for a safe, reliable operation.

## In The Reliability Space

Through the Process Solutions Group at John H. Carter Company, ControlWorx is able to provide full-service mechanical consulting and predictive services for rotating equipment like pumps, compressors, fans/blowers, turbines, and more. Whether it be for new projects or helping a plant run and maintain, our team has the expertise and analytical tools to get the job done right.
